ASPEN COVE WATER MANAGER SERVICE AGREEMENT

Agreement made this _____ day of February, 2019, between Aspen Cove Homeowner's Association (hereinafter "Aspen Cove") and MK Erkkila, L.C. (hereinafter "Contractor") for the provision of providing water management and related services.

This contract shall be for a period of 5 years with an automatic renewal of 1 additional year following its expiration, unless terminated in writing. Contractor or Aspen Cove holds the right to exercise termination of this contract following 30 days written notice.

1. The parties agree, that the Contractor shall perform the following duties:
 - a. Collect 1 monthly water sample to be delivered to the local Utah State Health Department in Price, for bacteria testing. The sample must only be drawn from the approved Bacteriological Sample Site Plan approved by the Utah Department of Environmental Quality, Division of Drinking Water. Copies of the test results should be forwarded to the Board member over the water system.
 - b. Collect annual water samples for nitrate testing and the sulfate samples every three years for testing by Chem-Tech Ford Laboratory in Salt Lake City, or another State approved lab. A separate sample is required from each active water source (well) contributing to the water system. The lab will provide the sample containers and a small cooler to return the samples. The contractor may elect to deliver the water sample(s) to the lab for testing or send them by overnight mail, UPS, or other reliable overnight delivery service. The samples must be kept on ice from the time they are drawn until they are received at the lab.
 - c. Take required repeat water samples, if a water sample is not acceptable, as directed by the State of Utah.
 - d. Flush and or sanitize the water system as needed, from time to time, because of repairs to the system or other circumstances.
 - e. Inspect the controls and electronic devices in the well pump house weekly. If any concerns are found contact the designated board member. Gather the data provided on the "Inspection Sheet for Pump House" check list. Provide a copy of this report monthly to the board member for review by the HOA Board.

- ✓
- f. Three times each year, inspect the booster/fire pump vault to determine if any problems exist. Verify that each pump is operating properly. Complete and provide a copy of the "Aspen Cove Booster/Fire Pump Bunker Inspection" report generated during each inspection to the Board member. If a problem requires attention contact the designated Board member. If an emergency exists, make the necessary repairs and contact the Board member as soon as possible.
 - g. Semi-annually inspect the water storage tank. Determine the lid seal is providing the necessary seal to keep contaminants from entering the water supply. Make a visual inspection of the interior of the tank for rusting or any other condition that may need additional attention. On one of the inspections, exercise the tank outlet valve(s) to verify they are operating properly.
 - h. Inspect each of the 17 fire hydrants during the second quarter of each year. Exercise each hydrant to determine it is operating properly. If problems are encountered or observed, report the concerns to the designated Board member. If repairs are warranted, if they require little financial support make the repairs in a timely manner. If the repairs require more substantial financial consideration, contact the Board member for his and or the HOA Boards approval before proceeding. Provide an inspection report for each hydrant with sufficient information to describe the condition of the hydrant at each inspection, or after any needed repairs. These reports should be provided to the Board member in a timely manner.
 - i. Monitor the water system to identify any leaks and or breaks that may exist. Seek them out and make the required repairs. Prior to making repairs that would require significant financial cost, contact the Board member. Such an expense may require the approval of the HOA Board. If an emergency occurs, take immediate action to resolve the issue and contact the Board member as soon as possible.
 - j. If other conditions exist that are not covered specifically in this agreement with the water system; please contact the Board member for his or the HOA Boards consideration.

2. Payment for these services shall be made according to the following schedule:

a. Monthly water sample	Jan. 2019 - 2021	\$175.00 ea.
	Jan. 2022 - 2023	\$180.00 ea.
