

Attention: All Aspen Cove Owners

February 01, 2019

Gate Code Change

The exit code to the main gate & back gates is changing February 1. This code is also the temporary enter code for contractors (and guests). The new code is 5299 (which spells JAZZ).

Your personal enter code and remote will remain the same and will still work as normal. Changing the codes every 6 months helps maintain our security. That's why we have a gate in the first place. You can give your guests your personal enter code or the temporary enter code, which will change again August 1. However, we strongly recommend against giving your personal enter code, which is permanent, to contractors...Use the temporary code for this purpose. Remember your personal enter code and remote will work the same.

Enter #5299
Exit 5299
Rear Gate 5299

Thank you all who attended our annual HOA Meeting last week.

Please make your guests aware of the rules of Aspen Cove. We believe most of the issues that come up or damage that happens is from guests.

Also, if you have not done so please request to join our Aspen Cove HOA Facebook page for added information.
